INDEX

1. Financial Results as of March 31, 2015:

- i) Executive Summary
- ii) Management's Discussion & Analysis
- iii) GFNorte's General Information
- iv) Financial Statements
- v) Accounting Changes and Regulations
- vi) Loan Sales to Sólida
- vii) Notes to the Group's Financial Statements

GFNorte reports Net Income of Ps 3.88 billion in 1Q15

The main highlights of the quarter include:

- Adequate sequential and annual loan growth of 2% and 12% with good growth in both consumer and nonconsumer balances.
- Strong deposit growth of 3% and 17% for the period.
- Favorable evolution of asset quality, with the NPL ratio improving to 2.7% and across all loan books.
- Strong capitalization ratio of 15.20% and equity growth of 13% YoY.
- Annualized ROE for the quarter of 12.5% in line with 4Q14 result.
- Net income of Ps 3.88 billion growing 7% YoY impacted by normalized trading gains.
- Net Interest Margin strong at 4.5%.
- Core banking service fees increased 22% annually.

"All our business lines contributed to a strong start of the year" commented Marcos Ramírez, GFNorte's CEO. The first months of the year are challenging as general banking and financial activities slowdown from the strong dynamism that they present during the last months of every year. It is worth noting the growth in our loan books despite a challenging environment with strong pricing competition in the corporate and government segments, strong liquidity in the domestic capital markets, which continue to disintermediate bank financing".

"The Financial Group and its subsidiaries posted adequate results with net income of Ps 3.9 billion, increasing 7% annually, mainly because of a good growth in net interest income and banking fees and the solid asset quality performance that resulted in lower loan loss provisions. Also we are encouraged by the strong growth observed in the income from core banking services, which are the result of the changes that we are implementing in our retail business model to improve client profitability".

"Afore reported net income of Ps 598 million, a strong result considering the 3 bps reduction in its fee implemented at the beginning of the year. The Insurance and Pension companies posted strong aggregate net income of Ps 674 million and in line with our expectations. We remain focused on increasing our business penetration in bancassurance".

"Operating leverage during the quarter was negative, as operating expenses grew 12%, higher than the 8% growth in revenues. The explanation of this trend is seasonality. Operating expenses should normalize in the next coming months as we continue to manage them down and benefit from the reduction in personnel that we implemented in 1Q15. Our goal remains to bring down the group's efficiency ratio from the result reported in 2014".

"Our capital position continues to be strong with a Capitalization ratio at 15.20%. The bank's high quality capital levels were supported by a 13% growth in equity, which also partially explains the reduction in ROE.

"We continue to build our relationships with our customers and we expect that loans and deposits should continue to post favorable trends as banking activity picks up in the coming quarters".

The financial information presented in this Quarterly report has been calculated in pesos and the following tables are in million pesos, thus, they may seem to have some errors but the differences are because of rounding effects.

NIM after Provisions (2)	3.4%	4.0%	3.5%	(0.5 pp)	0.0 pp

¹⁾ NIM = Annualized Net Interest Income / Average Interest Earnings Assets.

During 1Q15, GFNorte's Net Interest Income grew 12% YoY from Ps 10.35 billion to Ps 11.64 billion driven by:

- a 12% increase in the Net Interest Income from the loan portfolio, as high yielding consumer loans have gained share in the loan book; also,
- higher contribution from the insurance and annuities companies net revenues amounting to 40%, as a result of lower reserve requirements.

For the quarter, the (6%) QoQ decline in Net Interest Income, is mainly explained by

- a reduction in loan origination fees, as they normalized vs. 4Q14; and,
- Net Interest Income from repo operations declined (25%).

Insurance and Annuities Net Interest Income in 1Q15 reflected a **lower income from valuation due to inflation adjustment on these companies' securities**, which amounted to Ps 259 million in 1Q15, comparing to the Ps 939 million in 4Q14 and the Ps 820 million in 1Q14. Its effect in the margin is offset in *technical reserves* requirements, and therefore, they are neutral to the Net Interest Income of these companies.

The average Net Interest Margin (NIM) stood at 4.5% in 1Q15, 3 bp higher vs. 1Q14 and 64 bp lower vs. 4Q14. The annual increase resulted from growth in productive assets in higher yielding segments, while the quarterly decrease resulted from lower loan origination fees.

The average NIM excluding Insurance and Annuities companies was 4.2% in 1Q15, decreasing (8) bp YoY, and (74) bp QoQ.

²⁾ NIM= Annualized Net Interest Income adjusted by Loan Loss Provisions / Average Interest Earnings Assets.

The average NIM adjusted for Credit Risks was 3.5% in 1Q15, a 5 bp YoY increase driven by growth in Net Interest Income, which offset the annual increase in provisions. On a quarterly basis, this ratio decreases 52 bp due to the net effect of a smaller loan loss provision charge and the reduction in loan origination fees.

Loan Loss Provisions

In 1Q15 Loan Loss Provisions charged to results totaled Ps 2.61 billion, 9% higher YoY vs. 1Q14 and (4%) lower vs. 4Q14.

The annual increase resulted from higher reserve requirements in consumer and commercial loan balances. The smaller quarterly change is due to lower provision requirements in the corporate and government books.

The Group's credit cost improved significantly during the quarter, accumulated loan loss provisions for 1Q15 stood at 2.2% of average loans, decreasing (4) basis points YoY and (18) basis points QoQ.

Other Operating Income (Expenses)	673	887	423	(52%)	(37%)	
Non Interest Income	3,770	3,715	3,624	(2%)	(4%)	

Includes fees from letters of credit, transactions with pension funds, warehousing services, financial advisory services and securities trading by the Brokerage House among others.

During 1Q15, Non-Interest Income totaled Ps 3.62 billion. Service fees grew a strong 15% annually, yet trading income, recoveries and other fees declined bringing down total Non-Interest Income (4%) annually. On a quarterly basis, **Non-Interest Income** reported a (2%) contraction vs. 4Q14 driven by lower service fee revenue related to seasonality and a similar behavior in the other items as already explained.

^{2.} Most of these revenues are related to recoveries of loan charge-offs.

It is worth noting that core banking fees, including account management fees, funds transfers and electronic transfers reported strong quarterly and annual growths of 3% and 22%, as changes were made to the pricing structure of various products to improve revenue.

Other Operating Income and Expenses

Other Operating Income (Expenses)	1Q14	4Q14	1Q15	Cha	Change	
(Million Pesos)				QoQ	YoY	
Subtotal Other Operating Income (Expenses)	192	334	94	(72%)	(51%)	
Loan Recovery	241	264	299	13%	24%	
Income from foreclosed assets	(100)	55	13	(77%)	(113%)	
Other Operating Income	129	102	48	(53%)	(63%)	
Other Operating Income (Expense)	(77)	(87)	(266)	206%	243%	
Non Operating Income (Expense), net	298	380	144	(62%)	(52%)	
Other Products	761	490	1,219	149%	60%	
Other Recoveries	318	429	208	(51%)	(35%)	
Other (Expenses)	(781)	(538)	(1,283)	138%	64%	
Other Operating Income (Expense) from Insurance and Annuities	183	173	185	7%	1%	
Other Operating Income (Expenses)	673	887	423	(52%)	(37%)	

During 1Q15 Other Operating Income (Expenses) totaled Ps 423 million, decreasing Ps 250 million or 37% YoY. The main reduction was result of the Ps 211 million expense charge to adjust valuations of Solida's investment projects related to homebuilders.

On a quarterly basis, Other Operating Income (Expenses) decreased Ps 465 million or (52%) vs. 4Q14, similarly affected by the valuation charge already explained.

Recoveries

Non-Interest Income from Loans Recoveries totaled Ps 542 million in 1Q15, a 9% YoY increase driven as higher revenues of loan write-offs and sales of foreclosed assets grew by 122% or Ps 171 million. The quarterly reduction of (31%) is explained by lower recoveries due to cyclicality.

Non-Interest Expense

Non Interest Expense	4044	4044	404E	Change	
(Million Pesos)	1Q14 4Q14		1Q15	QoQ	YoY
Personnel	3,074	4,054	3,390	(16%)	10%
Professional Fees	645	900	515	(43%)	(20%)
Administrative and Promotional	1,249	1,599	1,722	8%	38%
Rents, Depreciation & Amortization	848	958	992	4%	17%
Taxes other than income tax & non deductible expenses	467	517	444	(14%)	(5%)
Contributions to IPAB	459	487	510	5%	11%
Employee Profit Sharing (PTU)	103	74	98	31%	(5%)
Non Interest Expense	6,845	8,590	7,670	(11%)	12%

Non-Interest Expenses during 1Q15 amounted to Ps 7.67 billion, a 12% YoY increase which is mostly explained by two elements: Personnel expenses grew Ps 316 million by an additional charge for severance payments as there was a reduction in personnel in the quarter, and higher salaries as compared to the prior year related to annual salary increases and other minor personnel related expenses that increased as well. Additionally, administrative and promotional expenses increased by Ps 472 million, related to ongoing business growth such as higher insurance expenses, expenses related to higher transactions in ATMs and POS, software development expenses and other administrative expenses whose increases are related to inflation.

Non-Interest Expenses declined (11%) vs. 4Q14, as expenses in 1Q15 tend to be lower due to seasonality effects and to provisions in personnel expenses for severance payments in December 2014.

The Efficiency Ratio during 1Q15 was 50.3%, 1.8 pp higher YoY and (2.9pp) lower QoQ. The annual increase was driven by a combination of a higher growth rate in Operating Expenses versus total revenues. The quarterly improvement was due to the decrease in Operating Expenses.

Taxes

Income taxes for 1Q15 totaled Ps 1.33 billion, an (11%) YoY decrease; and, a 1% increase vs. 4Q14, as there were higher expenses deductible from taxes. **The effective tax rate and Employee Profit Sharing in 1Q15 was 28.1%,** a favorable result vs. the 32% of 1Q14 and the same as in 4Q14.

Subsidiaries and Minority Interest

During 1Q15, Subsidiaries and Minority Interest reported Ps 225 million in profits, (2%) lower vs. 1Q14 and (19%) lower vs. 4Q14. The annual decrease was due to lower profits in associated companies, although this result was compensated by an increase in the Afore XXI Banorte's profits during this period. The quarterly decline of Ps 28 million was caused by lower profits for Afore XXI Banorte and other associated companies.

Net Income

In 1Q15 GFNorte reported Net Income of Ps 3.88 billion, 7% higher vs. 1Q14 as revenues showed a more modest growth rate mainly driven by lower trading income than the prior year and the Ps 211 million valuation charge in investment projects. Net Income increased by Ps 61 million, 2% higher vs 4Q14, as a result of the cyclical dynamic of the quarter.

In the last 12 months Net Income rose to Ps 15.48 billion, 11% higher vs. the same period in 2014 and 2% higher than the one reported at the end of 2014.

During the first quarter of 2015, accumulated recurring revenues (NII + net fees excluding portfolio recoveries - Operating Expenses – Provisions) **totaled Ps 3.59 billion, 17% higher vs. 1Q14** due to the increase in Net Interest Income and Service fees, which offset growth in Operating Expenses and Loan Loss Provisions. **The quarterly growth of 1% vs. 4Q14** is a result of the combined effect of lower Loan Loss Provisions and Operating Expenses and the decrease in Net Interest Income and Service fees.

ROE for 1Q15 was 12.5%, lower in 84 bp vs. 1Q14 and in 17 bp vs. 4Q14. Equity increased 13% YoY and 3% QoQ.

Return on Tangible Equity (ROTE) was 15.9% for 1Q15.

Return on Tangible Equity (ROTE)

^{1.} Includes Market and Operational Risks. Inter-company eliminations are excluded.

Banorte has fully adopted the capitalization requirements established to date by Mexican authorities and international standards, so-called Basel III, which came into effect as of January 2013.

At the end of 1Q15 the estimated Capitalization Ratio (CR) for Banorte was 15.20% considering credit, market and operational risk; and, 22.3% if only credit risks are considered.

The Core Tier 1 ratio was 12.79%, Total Tier 1 ratio was 13.64% and Tier 2 was 1.56%.

The Capitalization Ratio decreased (0.06 pp) vs. 4Q14, as follows:

1. 2. 3.	Profits for 1Q15 Valuation of Financial Instruments, Securitizations and Equity Accounts Investment in Subsidiaries and Intangibles	+0.60 pp +0.10 pp -0.04 pp
4.	Decrease of Subordinate Debt effectiveness	-0.12 pp
5.	Dividend payment in January 2015	-0.13 pp
6.	Growth in risk assets	-0.47 pp
The	Capitalization Ratio increased 0.04 pp vs 1Q14, as follows:	
1.	Profit growth for the period	+2.53 pp
1. 2.	Profit growth for the period Valuation of Financial Instruments, Securitizations and Equity Accounts	+2.53 pp +0.22 pp
2.	Valuation of Financial Instruments, Securitizations and Equity Accounts	+0.22 pp

. Growth in risk assets -1.4 pp

^(*) The reported capitalization ratio of the period is estimated.

Deposits

- 1. 2. Includes Debit Cards.
- Includes Bank Bonds (Customers and Financial intermediaries).
- 3. Includes eliminations among subsidiaries: 1Q14 = (Ps 203) million; 4Q14 = (Ps 774) million; 1Q15 = (Ps 1.36) billion.

Total Deposits

At the end of 1Q15, GFNorte's Total Deposits amounted to Ps 513.90 billion, a 13% YoY increase of Ps 58.56 billion driven mainly by efforts to promote Banorte deposit products, as well as higher account balances of clients, in all segments as well as in the retail network. The QoQ increase of Ps 15.98 billion or 3% is positive as the first quarter of the year deposits usually decline due to seasonality. The increase in core deposits (+3%) compares favorably to prior years, for example in 1Q14 they increased 0.3% and 1Q13 they decreased (1%).

Total Performing Loans

Total Performing Loans increased 12% YoY, growing by Ps 52.29 billion totaling Ps 479.66 billion in 1Q15, excluding proprietary loans managed by the Recovery Bank. The Loan portfolio has maintained a growth rate above GDP growth. Corporate and business balances (included in the commercial book) continue to be affected by prepayments from customers.

Total Performing Loans increased 2% QoQ, growing by Ps 8.05 billion, as a result of growth in the government, mortgage, payroll and commercial portfolios, offsetting both, the decrease in the corporate portfolio and the fact that credit card and car loan balances remain flat versus the previous quarter.

Portfolio growth by segments was:

Individual Loans

- ✓ Consumer + Mortgage: Increased by Ps 17.64 billion or 12% vs. 1Q14 and Ps 2.62 billion or 2% QoQ closing 1Q15 with a balance of Ps 160.75 billion. Annual growth was a result of favorable dynamics in all segments with the exception of car loans; mortgage and payroll portfolios' growth dynamics during the quarter offset the unchanged level presented by the credit card and car loan portfolios in the quarter. Due to the strategy to increase this segment, Consumer loans (excluding Mortgages) have increased their proportion within the Performing Loan portfolio from 14.1% to 14.5% in the last 12 months.
- Mortgages: Grew by Ps 8.19 billion or 10% YoY, posting a balance of Ps 91.15 billion, driven by favorable dynamics in mortgages for middle-income housing, liquidity programs, the mortgage program with PEMEX and in products for construction, remodeling and payment of liabilities. During the quarter the portfolio grew by Ps 1.39 billion or 2% QoQ. As of February 2015, Banorte held 16.2% of the market share in balances (ranking third) and 16.9% in new mortgage loan production ranking fourth in the system.

- ✓ Credit Cards: At the end of 1Q15 the portfolio totaled Ps 23.20 billion, a 15% YoY increase of Ps 2.95 billion and on a quarterly basis, practically remain the same as in 4Q14. The annual growth was due to portfolio management strategies, promotional campaigns for Banorte Ixe products and more cross-selling to clients. Banorte Ixe held an 8.1% market share of the system in balances as of February 2015, ranking fourth.
- Payroll: At the end of 1Q15, the portfolio increased Ps 6.96 billion or 25% YoY and Ps 1.24 billion or 4% QoQ totaling Ps 35.33 billion, as a result of growth in the number of Banorte-Ixe payroll account holders, as well as campaigns to promote the product, multichannel cross-selling strategies and product adjustments to provide more flexibility to clients in order to disburse amortized balances; additionally, in March 2014 Banorte acquired a Payroll loan portfolio from another institution. Payroll loans continue to show vigorous growth with good asset quality with respect to the system's average. Banorte Ixe held a 19.3% market share in balances as of February 2015, ranking third in the system.
- Car Loans: The portfolio decreased by (Ps 459) million or (4%) YoY and (Ps 3) million QoQ to end 1Q15 with Ps 11.07 billion. These decreases were due to fewer new loan placements given the growing competition from financial firms of car manufacturers in the last months. As of February 2015, Banorte-Ixe held a 14.5% market share, ranking fourth in the system, excluding loans granted by finance companies of car manufacturers.

II. Loans to Institutions

Commercial: increased by Ps 2.52 billion or 2% YoY and Ps 862 million or 1% QoQ totaling Ps 114.90 billion. As mentioned above, annual and quarterly balances' growth were affected by prepayments, as well as by the reduction in the SME portfolio, however, the leasing and factoring books presented positive growth in these periods. As of February 2015, the market share in Commercial loans (including Corporate) was 11.6%, ranking fourth place in the system.

The SME portfolio balance was Ps 27.86 billion, (Ps 5.09) billion or (15%) lower YoY; and (Ps 1.99) billion or (7%) lower vs. 4Q14.

SMEs Portfolio Evolution (billion pesos)

	1Q14	4Q14	1Q15
Performing Portfolio	Ps 32.95	Ps 29.85	Ps 27.86
% of Performing Commercial Portfolio	29.3%	26.2%	24.2%
% of Total Performing Portfolio	7.7%	6.3%	5.8%
NPL Ratio	6.8%	10.0%	8.8%

✓ Corporate: At the end of 1Q15 the balance was Ps 78.91 billion, increasing Ps 5.68 billion or 8% YoY and decreasing (Ps 1.55) billion or 2% QoQ. Client prepayments continued to flow. Banorte's corporate loan book is well diversified by sectors and regions and shows a low concentration risk. Banorte's 20 main corporate borrowers accounted for 11% of the bank's total portfolio, increasing by 0.16 pp vs. 4Q14 and 1.29 pp vs. 1Q14. The bank's largest corporate loan represents 1.5% of the total portfolio and has an A1 rating, while number 20 represents 0.3%.

Through its subsidiaries Banco Mercantil del Norte, Arrendadora y Factor Banorte and Solida Administradora de Portafolios, GFNorte granted loans, and participated through SPVs in housing investments projects. Since 2013 some of the largest companies in this sector have experienced financial difficulties; three of the largest companies are undergoing a debt restructuring process and have defaulted on their payments. This situation has led to deterioration in the risk profile of these three borrowers. They are currently involved in restructuring negotiations with GFNorte and other banks.

As of March 31, 2015 the loan exposure was Ps 5.58 billion in Urbi Desarrollos Urbanos, S.A.B. de C.V., Corporación Geo, S.A.B. de C.V. and Desarrolladora Homex, S.A.B. de C.V., 0.7% higher than the prior quarter. This exposure represented 1.1% of the total loan portfolio, similar to December 2014. Out of these loans, Ps 5.42 billion were classified as non-performing, unchanged versus 4Q14. This exposure has a 76% coverage in guarantees. The reserve coverage stood at 43.1% in 1Q15. Sólida had Ps 5.96 billion in investment projects, 2.6% lower balance than registered in December 2014.

Government: At the end of 1Q15 the balance was Ps 125.09 billion, growing by Ps 26.46 billion or 27% YoY and Ps 6.12 billion or 5% QoQ as a result of efforts to continue meeting demand for loans in this segment, including some federal government entities. Banorte's Government portfolio is diversified by sectors and regions, and shows adequate concentration. Banorte's 20 largest Government loans account for 23.4% of the Bank's total portfolio, increasing by 1.1 pp vs. 4Q14 and 3.4 pp vs. 1Q14. The largest Government loan represents 4.4% of the total portfolio and has an A1 rating, while number 20 represents 0.3%. The portfolio's risk profile is adequate with 31.3% of the loans granted to Federal Government entities and over 95% of loans to States and Municipalities have a fiduciary guarantee (Federal budget transfers and local revenues such as payroll tax), and less than 2% of the loans have short-term maturities. Risk adjusted profitability for Government Banking is high. As of February 2015, Banorte held a 23.9% market share of the total system, ranking second.

Past Due Loans

During 1Q15, Past Due Loans were Ps 13.47 billion, 2% higher YoY as a result of higher delinquencies in commercial loans (including SMEs), consumer loans and mortgages. The (6%) QoQ decrease came from lower delinquencies in commercial (including SMEs), Mortgages, Car loans and Credit cards.

The quarterly evolution of NPL balances were as follows:

Million pesos	PDLs 1Q15	Change. Vs. 4Q14	Change. Vs. 1Q14
Credit Cards	1,357	(1)	14
Payroll	798	9	230
Car loans	163	(60)	16
Mortgage	1,176	(98)	74
Commercial	4,543	(672)	320
Corporate	5,437	2	(330)
Government	-	-	(1)
Total	13,474	(819)	324

In 1Q15, the Past Due Loan Ratio was 2.7%, (25 bp) lower vs. 1Q14 and (21 bp) lower vs. 4Q14. The annual decrease came from lower delinquencies in the corporate and credit card segments; while the quarterly decrease was the result of a lower PDL Ratio in the commercial, car loan, mortgage and payroll segments.

When excluding the home developers exposure, the PDL Ratio would be 1.6%, (10 bp) below the level registered for 1Q14 and (20 bp) lower than in 4Q14.

PDL Ratios by segment showed the following trends during the last 12-months:

	1Q14	2Q14	3Q14	4Q14	1Q15
Credit Cards	6.2%	6.3%	5.9%	5.5%	5.5%
Payroll	2.0%	2.5%	2.2%	2.3%	2.2%
Car loans	1.3%	1.9%	1.9%	2.0%	1.5%
Mortgage	1.3%	1.3%	1.4%	1.4%	1.3%
Commercial	3.6%	3.9%	5.0%	4.4%	3.8%
Corporate	7.3%	7.3%	6.8%	6.3%	6.4%
Government	0.0%	0.0%	0.0%	0.0%	0.0%
Total	3.0%	3.1%	3.3%	2.9%	2.7%

The expected loss of Banco Mercantil del Norte, the Financial Group's main subsidiary, represents 1.9% and the unexpected loss 3.2%, both with respect to the total portfolio at the end of 1Q15. The average expected loss represented 1.9% for the period of January to March 2015. These ratios were 1.9% and 3.2%, respectively in 4Q14 and 2.0% and 3.3% 12 months ago.

Banco Mercantil del Norte's Net Credit Losses (NCL) including discounts was 1.5%, an increase of 30 bp vs. 4Q14 as a result of write-offs realized during the quarter.

Quarterly changes in accounts that affect Non Performing Loans' balances for the Financial Group were:

1.- The ratings of loans and reserves created correspond to the last day of the month referred to in the Balance Sheet as of March 31, 2015.

2.- The loan portfolio is rated according to the rules issued by the Ministry of Finance and Public Credit (SHCP), the methodology established by the CNBV.

3.- The additional loan loss reserves follow the rules applicable to banks and credit institutions.

Based on B6 Credit Portfolio criteria of the CNBV, a Distressed Portfolio is defined as those commercial loans unlikely to be recovered fully, including both principal and interest pursuant to terms and conditions originally agreed. Such determination is made based on actual information and data and on the loan review process. Performing loans and pastdue loans are susceptible of being identified as Distressed Portfolios. The D and E risk degrees of the commercial loan rating are as follows:

(Million Pesos)	Total
Distressed Portfolio	11,280
Total Loans	529,583
Distressed Portfolio / Total Loans	2.1%

Loan Loss Reserves and Loan Loss Provisions

Loan Loss Reserves in 1Q15 totaled Ps 14.57 billion, (5%) lower vs. 4Q14. Moreover, 58% of write-offs, charge-offs and discounts corresponds to the Commercial portfolio, 29% to Consumer and 13% to Mortgages.

Similarly, the loan loss coverage ratio was 108.1% (107.5% excluding INB), increasing 2.4 pp YoY and 1.2 pp QoQ.

RECENT EVENTS

Credit Ratings

Standard & Poor's confirms ratings for Banco Mercantil del Norte and Casa de Bolsa Banorte Ixe

On April 16, 2015, Standard & Poor's confirmed ratings for Banco Mercantil del Norte and Casa de Bolsa Banorte Ixe, all with stable Outlook.

The rating confirmation reflects the strong internal capital generation, business diversification and its strategic direction.

Fitch Ratings confirms ratings for Grupo Financiero Banorte and subsidiaries

On March 20, 2015, Fitch Ratings confirmed ratings for GFNORTE, Banorte, Arrendadora y Factor Banorte, Almacenadora Banorte and Casa de Bolsa Banorte Ixe, all the aforementioned with stable outlook.

GFNORTE's ratings confirmation reflects the growth and diversification of the business achieved in recent years; while Banorte's ratings confirmation reflects its strengthening, stability, clear and effective strategy of organic growth, income diversification, an adequate financial performance and its capital strength - allowing the entity to position as one of the largest banks in the Mexican banking system -. On the other hand, ratings of the nonbank subsidiaries consider GFNORTE's support and the strategic importance of these entities in the group's strategy.

• Farmacias Guadalajara became part of our third party correspondents

On March 2, 2015, Farmacias Guadalajara started to receive Banorte and Ixe credit card payments and transactions under the third party correspondent scheme in its 1,362 stores.

Brand Finance – Banking 500

In February, the independent intangible asset valuation consultancy, Brand Finance, published the results of the tenth edition of the "Banking 500" study, which assesses the 500 most valuable banking brands in the world. This year Banorte ranked in the 138 position, increasing 8 places vs. 2014, and its value amounted to USD \$14,339 million.

Recognitions

In February, Operadora de Fondos Banorte Ixe received the award for the second time in a row of Best Aggressive-Mixed Fund in Mexico 2015 by Morningstar.

Grupo Financiero Banorte, a leader in climate change transparency

For second year in a row, GFNorte was included in the Latin American *Climate Disclosure Leadership Index 2014*. We had the highest score in transparency in Mexico and the Latin American financial sector. This index awards the leading companies in transparency of climate change as they exhaustively disclose high quality information on:

- · Measurement, verification and management of their carbon footprint,
- Climate change mitigation strategy,
- Risk management process and results.

Net Interest Income	9,033	10,712	9,790	(9%)	8%
Provisions	2,369	2,704	2,539	(6%)	7%
Net Interest Income Adjusted for Credit Risk	6,664	8,008	7,250	(9%)	9%
Average Productive Assets	763,124	810,376	845,437	4%	11%
Net Interest Margin (1)	4.7%	5.3%	4.6%	(0.7 pp)	(0.1 pp)
NIM after Provisions (2)	3.5%	4.0%	3.4%	(0.5 pp)	(0.1 pp)

¹⁾ NIM = Annualized Net Interest Margin for the quarter / Average of Performing Assets.

During the 1T15, Net Interest Income increased 8% to Ps 9.79 billion as a result of the 7% YoY growth in interest income and net fees related to loan originations resulting from an improved portfolio mix with a higher percentage of Consumer loans.

Net Interest Income decreased by (9%) vs. 4Q14, mainly due to the decrease in loan origination fees, as they normalized versus 4Q14. Net interest income grew 1% in this period.

The average NIM was 4.6% in 1Q15 lower by (0.1 pp) over the same period last year and (0.7 pp) lower vs. 4Q14, both decreases were a result of a faster rate of growth in the Performing Assets Average than in Net Interest Income, impacted by the aforementioned.

The average NIM adjusted for Credit Risks was 3.4% in 1Q15, decreasing by (0.1 pp) compared to the same period in 2014 and (0.5 pp) vs. 4Q14.

Loan Loss Provisions

Provisions charged to results totaled Ps 2.54 billion in 1Q15, 7% higher vs. 1Q14 and (6%) lower vs. 4Q14. The annual increase is mainly explained by increased requirements in the Consumer and Commercial loan portfolios; while the quarterly decrease vs. 4Q14 was mainly due to fewer provisions in the Corporate and Government loan portfolios.

Non-Interest Income

Non Interest Income	1014	4Q14	1Q15	Cha	nge
(Million Pesos)	1Q14	4014	IQIS	QoQ	YoY
Services	1,997	2,454	2,375	(3%)	19%
Recovery	6	21	6	(70%)	9%
Trading	1,048	372	850	128%	(19%)
Other Operating Income (Expense)	406	708	419	(41%)	3%
Non Interest Income	3,457	3,554	3,650	3%	6%

During 1Q15, Non-Interest Income amounted to Ps 3.65 billion, an increase of 6% YoY as a result of increases in Service Fees (due to an improved pricing structure), Other Operating Income (Expenses) and real estate portfolio recoveries, which offset the decrease in trading revenues. On a quarterly basis, Non-Interest Income grew 3% vs. 4Q14, due to the significant recovery of trading revenues that offset decreases in other areas affected by seasonality; although some items such as account management, fund transfers and fiduciary income during this period showed growth due to changes made by the Bank in some of the fee structures on products and transactions.

²⁾ NIM = Annualized Net Interest Margin for the quarter adjusted for Credit Risks / Average of Performing Assets.

Non-Interest Expenses

Non Interest Expense	1Q14	4Q14	1Q15	Char	nge
(Million Pesos)	10(14	40(14	10(13	QoQ	YoY
Personnel	2,950	3,912	3,249	(17%)	10%
Professional Fees	548	770	434	(44%)	(21%)
Administrative and Promotional	1,108	1,388	1,504	8%	36%
Rents, Depreciation & Amortization	789	889	927	4%	17%
Taxes other than income tax & non deductible expenses	420	371	368	(1%)	(12%)
Contributions to IPAB	459	487	510	5%	11%
Employee Profit Sharing (PTU)	99	70	96	37%	(4%)
Non Interest Expense	6,374	7,887	7,087	(10.1%)	11%

Non-Interest Expenses in 1Q15 totaled Ps 7.09 billion, an 11% YoY increase driven by growth in Administration and Promotional Expenses, Personnel Expenses (due to additional charges for liquidations carried out during the quarter) and Rents, Depreciations and Amortizations. **Non-Interest Expenses decreased (10%) QoQ** due seasonality and a reduction in Personnel Expenses.

The Efficiency Ratio for 1Q15 was 52.7%, 1.7 pp higher YoY vs. 1Q14 due to a higher growth rate in Operating Expenses than in total revenues; while the quarterly ratio decreased in (2.6 pp) as a result of the decrease in Interest Expenses offsetting the reduction in total income.

Net Income

Net Income for the Banking Sector in 1Q15 was Ps 3.08 million, increasing by 9% vs. 1Q14 driven by growth in total revenues and lower tax payments, which offset increases in Operating Expenses and Provisions. On a quarterly basis, net income increased 3% vs. 4Q14 due to lower Non-Interest Expenses and Provisions and to growth in Non-Interest Income, which offset the decrease in Net Interest Income.

Net Income for the Banking Sector in 1Q15, excluding Afore XXI Banorte results, was Ps 2.73 billion, contributing 70% of the Financial Group's profits according to its percentage of participation.

SOFOM Banorte-Ixe Tarjetas posted net profits of Ps 407 million in 1Q15, 8% higher YoY vs. 1Q14 and 4% higher QoQ vs. 4Q14, contributing 10.5% of the Financial Group's profits.

ROE for 1Q15 of this sector was 12.8%, (1.2 pp) lower vs. 1Q14 and (0.1 pp) lower vs. 4Q14. ROA for 1Q15 was 1.4%, remaining the same as in 4Q14.

NPL Ratio

The Banking Sector's NPL Ratio for 1Q15 was 2.7% (includes INB past due loans), (0.3 pp) lower YoY vs. 1Q14 and (0.2 pp) lower QoQ vs. 4Q14.

BANORTE USA

I. Banorte USA

Transactions					
# of created transactions (thousand)	1,704	2,176	2,119	(3%)	24%

UniTeller Financial Services and subsidiaries (UFS) recorded profits of US \$570 thousand in 1Q15, comparing favorably to profits of US \$342 thousand for the same period of the previous year (+67%), mainly due to more transactions.

At the end of 1Q15 transactions showed a 24% YoY growth, resulting mainly from the expansion of the processing business, including more services to other institutions.

IV. Solida USA

Assets under management by Solida USA as of 1Q15 are as follows:

Solida Mexico (Foreclosed Assets): US \$ 16 million
Banorte (Foreclosed Loans and Assets): US \$ 71 million
US \$ 6 million
Total: US \$ 93 million

As a result of the adequate asset management, INB's Tier 1 Classified Assets Ratio at the end of 1Q15 was 5.3%, higher quality levels than the average district and national competitors.

Investment Projects:	6,063	Solida Asset Management and Banorte	Non Interest Income
Total	131,087		

Net Income

Recovery Banking posted profits of Ps 141 million in 1Q15, (7%) lower than the same period in 2014, driven by higher tax payment, Non-Interest Expenses and loans provisions, and lower Net Interest Income, which offset higher Non-Interest Income. Recovery Banking's Net Income represents 3.6% of the Group's profits.

Assets Under Management

The Recovery Bank **managed total assets of Ps 94.5 billion** at the end of the 1Q15, of which 30% corresponds to mortgage loans, 16% to Crediactivo, 16% to credit cards, 15% to payroll loans, 7% to foreclosed assets, 7% to car loans, 6% to middle market companies, 1% to commercial, 1% to personal loans and 1% to affiliates. Gross revenues generated by the portfolio during 1Q15 amounted to Ps 257 million, 16% higher YoY.

At the end of 1Q15, of the **Ps 30.5 billion in portfolios acquired and managed** by the Recovery Bank, 35% are mortgages, 21% to middle market companies and commercial loans, 20% to the portfolio managed on behalf of the Mexican mortgages agency SHF, 12% to foreclosed assets and payments in kind and 11% to real estate portfolios. These portfolios generated gross revenues in 1Q15 of Ps 176 million, 3% higher YoY.

Net Capital (1)	2,234	2,353	2,379	1%	7%

¹⁾ Net capital structure: Tier 1 =Ps 2.35 billion, Tier 2 = Ps 0 million.

Net Income

The Brokerage Sector (Casa de Bolsa Banorte Ixe and Operadora de Fondos Banorte-Ixe) reported profits of Ps 163 million in 1Q15, (20%) lower than in the same period of last year due to reduced Net Interest Income, as well as higher Non-Interest Expenses; which did not offset the increase in trading revenues and loan origination fees.

In 1Q15 Net Income declined (7%) quarterly as a result of lower NII and higher taxes; factors that were not offset by increased trading revenues and reduced Non-Interest Expenses.

Profits from the Brokerage Sector in 1Q15 represent 4.2% of the Financial Group's earnings.

Mutual Funds

Operadora de Fondos Banorte Ixe reported profits of Ps 57 million in 1Q15, an increase of Ps 36 million, or 168% vs. the same period last year due to greater fees from growth in assets under management. Quarterly earnings grew by Ps 42 million, or 285%, due to more loan origination fees and reduced Non-Interest Expenses.

At the end of 1Q15, assets managed by Banorte-Ixe mutual funds **totaled Ps 146.1 billion, an annual growth of 20%.** Assets held in fixed income funds totaled Ps 128.2 billion, a 19% increase YoY, while equity funds held assets of Ps 17.9 billion, an annual increase of 28%. At the end of March, Banorte-Ixe had a 7.7% share of the mutual fund market, comprised of 9.0% in fixed income funds and 3.8% in equity funds.

Assets Under Management

At the end of 1Q15, AUMs totaled Ps 738.5 billion, increasing 11% YoY and decreasing 1% QoQ.

^{1.} Afore XXI Banorte's results are shown in Banco Mercantil del Norte through the equity participation method. For comparative purposes, Afore XXI Banorte's income is included in this section.

Afore XXI Banorte

Afore XXI Banorte posted net profits of Ps 598 million for 1Q15, 4% higher vs. 1Q14 due to higher total revenues, which offset higher Operating Expenses and taxes and fewer profits from subsidiaries. Quarterly profits declined by (9%) as a result of valuation losses in the invested capital, reduced total income and profits from subsidiaries.

ROE for Afore XXI Banorte at the end of 1Q15 was 10.3%, 1.0 pp higher YoY and (0.6pp) lower QoQ; when excluding goodwill, **ROE would be 37.3%.** According to GFNORTE's participation in this sector, Afore XXI Banorte contributed 7.6% of the Financial Group's profits for 1Q15.

Assets under management as of March 2015 totaled Ps 616.4 billion, an increase of 11% YoY and 2% QoQ.

According to CONSAR, to February 2015 Afore XXI Banorte had a 25.3% share in managed funds, ranking 1st in the market, with 11.28 million accounts (this number does not include 6.3 million accounts managed by Afore XXI with resources deposited in Banco de Mexico), which represent a 24.2% share of the total number of accounts in the system, making it the market leader.

Seguros Banorte

During 1Q15, **Seguros Banorte reported profits of Ps 586 million**, 23% higher YoY due to growth in Net Interest Income (mainly premium incomes), which offset lower Non-Interest Income and higher taxes and Non-Interest Expenses. On a quarterly basis, profits increased 15%, driven by growth in Net Interest Income (mainly due to reduced technical reserves) and lower Non-Interest Expenses, offsetting the decrease in Non-Interest Income and higher taxes. Seguros Banorte represents 15.1% of the Financial Group's earnings in 1Q15.

Issued premiums increased 10% YoY and 19% QoQ totaling Ps 5.44 billion. Technical Reserves totaled Ps 14.50 billion, increasing 25% YoY and 6% QoQ.

ROE for the Insurance company was 43.8% in 1Q15, (3.2 pp) lower YoY and +1.2 pp higher QoQ.

Regarding the disclosure requested by the General Provisions applicable to Financial Groups' controlling companies, for this reporting period:

- i. Risks assumed through the issuance of insurance premiums and bonds, with respect to operations and authorized branches of cancelled operations.
 - No cancellations were registered during 1Q15 that involved any technical risk.
- ii. Damages and claims, as well as the fulfillment with reinsurers and bonding companies according to their participation.
 - In 1Q15 damage ratios remained under control.
- iii. Costs derived from placement of insurance policies and bonds.
 - There were no relevant events to disclose in 1Q15.
- iv. Transfer of risks through reinsurance and bonding contracts
 - In the P&C book four important businesses of governmental tenders were ceded to reinsurers, mainly foreign ones, by which 100% of the risk was transferred.
- v. Contingencies arising from non-fulfillment by reinsurers and bonding companies.
 - There were no relevant events in 1Q15.

Pensiones Banorte

During 1Q15, Pensiones Banorte reported profits of Ps 88 million, increases of 59% YoY and 18% QoQ. Both growths were due to growth in Net Interest Income and more controlled spending, offsetting the decrease in Non-Interest Income and higher taxes. The Annuities company contributed 2.3% of the Financial Group's profits.

ROE was 24.8% in 1Q15, 7.4 pp higher vs. 1Q14 and +3.7 pp vs. 4Q14.

^{1.} Includes pure leasing portfolio registered in property, furniture and equipment (net).

Leasing and Factoring

In 1Q15 Arrendadora y Factor Banorte reported profits of Ps 136 million, decreasing (21%) YoY and (35%) QoQ driven by the Income Tax generated in 2015 and higher provisions, which were not offset by growth in Net Interest Income and Other Operating Income. The Leasing and Factoring Company contributed 3.5% of the Financial Group's profits in 1Q15.

ROE for the Leasing and Factoring company was 14.3% for 1Q15, (6.5 pp) lower YoY and (8.2pp) lower QoQ.

At the end of 1Q15, **the Past Due Loan Ratio was 1.0%**, 0.1 pp higher vs. 4Q14 and (0.2 pp) lower vs. 1Q14, while the **Coverage ratio was 159.8%**, 14.8 pp higher vs. 1Q14 and (10.7 pp) lower vs. 4Q14. **The Capitalization ratio estimated as of March was 16.5%** considering total risk-weighted assets of Ps [23.39 billion].

Arrendadora y Factor Banorte continues to be the market leader in terms of portfolio size and assets among the 47 companies in this sector, according to the Asociación Mexicana de Sociedades Financieras de Arrendamiento, Crédito y Factoraje, A.C. (AMSOFAC).

Warehouse

In 1Q15, **Warehouse posted profits of Ps 10 million**, growing by Ps 1 million YoY and decreasing by (Ps 12) million QoQ. The annual increase is due to growth in trading revenues and Net Interest Income, which offset the decrease in Other Operating Income and greater Administrative Expenses. The quarterly decline was driven by the reduction in Other Operating Income. Almacenadora Banorte contributed 0.3% of the Financial Group's profits in 1Q15.

ROE for 1Q15 was 17.8%, 4.6 pp higher YoY and (16.4 pp) lower QoQ.

At the end of 1Q15, the Capitalization Ratio was 35.8% considering assets at risk. The total certificates in circulation amounted to Ps 2.69 billion. Almacenadora Banorte ranks third among the 18 warehouses of this sector in terms of profits generated.

Solida Administradora de Portafolios

During 1Q15, Sólida Administradora de Portafolios reported a loss of (Ps 111) million, an annual variation of (Ps 72) million mainly due to a valuation charge of Ps 211 million related to the fair valuation of the investment projects in housing developers and regular provisions for the payroll loan book acquired by Banorte in 3Q14. The quarterly decrease of (Ps 41) is explained by the same reasons.

The Past Due Loan Ratio was 8.0% at the end of 1Q15. The Coverage ratio was 101.6%, comparing unfavorably to the 122.5% of 4Q14 and favorably to the 45.1% of 1Q14. The estimated Capitalization ratio at the end of 1Q15 was 17.0%, 0.8 pp higher vs. 4Q14 and 5.4 pp higher vs. 1Q14 (due to the increase in equity in 3Q14).

ACCOUNTING CHANGES AND REGULATIONS

Liquidity Coverage Ratio (LCR).

On December 31, 2014 the CNBV and the Bank of Mexico issued general regulations on liquidity requirements for banking institutions. The resolution establishes a Liquidity Coverage Ratio (LCR), with a calculation methodology following the international standard, which became effective on January 1, 2015.

Banorte has complied with the liquidity regulation by calculating the LCR on a monthly basis, as well as with the quarterly disclosure rules in Annex 5 of said publication.

Modification to the Severity of Loss Exposure for debtors in bankruptcy.

On October 30, 2014 the CNBV published an amendment to Regulations for the rating methodology of commercial loan portfolios, to make it congruent with Bankruptcy Law reforms published in January 2014 for loans granted to debtors applying for bankruptcy who had previously submitted a restructuring plan.

The resolution amends Article 114 of the Regulations and applies to the part not covered by real guarantees for loans granted to individuals or corporations who have filed for bankruptcy, with a previous restructuring plan. The amendment establishes that for such cases, Institutions may calculate an Updated Loss Estimate that reflects the best estimate of loss as a percentage of the past due portfolio, considering possible payments or mitigated losses that could be received as payment for the portion of the loan that is not covered.

The Severity of Loss to be used in these cases would be the maximum between the Updated Loss Estimate and the 45% established in the regulation as Severity of Loss for un-subordinated, uncovered positions with less than 18 months of arrears. This calculation can be maintained until an agreement between lender(s) and borrower is reached or until the borrower has been declared in bankruptcy in which case this modification would not apply and the uncovered portion of the loan will be set aside in accordance to the existing regulation which requires up to 100% of Loss Severity for loans 18 months or more in default.

Main changes in accounting criteria B-6 "Loan Portfolio".

On September 24, 2014, the Commission issued a resolution amending terms corresponding to Accounting Criterion "B-6 Loan Portfolio". The objective was to establish an accounting procedure that credit institutions must observe with regards to loans granted under the terms of Article 43 (Section VIII) and under Article 75 (Sections II and III of Article 224) of the Bankruptcy Act. The main changes are:

 In the definition of <u>past due loans</u> is specified that in order to exclude those loans from this definition whose borrowers have declared bankruptcy, the Banks must continue to receive payment on the principal and interest of such loans.

Past Due Loan Portfolio - Comprised of those loans:

- a) Whose debtors have declared bankruptcy, with the exception of those loans:
 - i. that continue to make payments under the terms outlined in Section VIII of Article 43 of the Bankruptcy Law, or
 - ii. granted under the protection of Article 75 in relation to Sections II and III of Article 224 of the aforementioned Law; or
- b) Whose principal, interest, or both not have been liquidated under the terms originally pacted, to the effect of that established in paragraphs 53 to 64 of the present criteria.
- The definition of <u>payment</u> is added.

Payment – the actual delivery of an item, amount or service due that has been agreed upon. Financial income from capital leasing or financial factoring, or capitalized interests is not considered as payment.

v. ACCOUNTING CHANGES

It is specified the statutory basis of the Bankruptcy Act in relation to the procedures that Banks must observe
to <u>transfer to past due loans</u> those loans to companies in bankruptcy, provided they are in arrears in the
payment of their principal and interest.

Transfer to Past Due Loan

The outstanding amount, following the conditions established in the loan agreement, will be registered past due when:

The debtor has declared bankruptcy, following Bankruptcy Law.

Without prejudice to the provisions of the present paragraph, those payments received under the terms outlined in Section VIII of Article 43 of the Bankruptcy Law, as well as loans granted protection under Article 75 in relation to Sections II and III of Article 224 of the Act, will be classified as past due when they have incurred the cases established in numeral 2 of paragraph 53 of Criterion B-6.

• Early termination of the mortgage debtor support programs.

On June 30, 2010, the Ministry of Finance and Public Credit (SHCP) on behalf of the Federal Government agreed (the Agreement) to the early termination of mortgage debtor support programs (end point and UDIS trusts) with banks. Consequently, as of January 1, 2011, the Holding Company absorbed the corresponding part of the discount offered in advance to mortgage debtors that participated in the program.

Some of the effects recorded in 2010 from the application of the Agreement which became effective as of the date it was entered into are presented below.

As of March 31, 2015, the total amount of the Federal Government's payment obligations with respect to commercial loans amounted to \$28 million, which includes \$27 million corresponding to the conditioned discount portion derived from loans denominated in local currency and in UDIS, and \$1 million related to the discount applied to loans referred to in number 3.1.2 of Circular 1430.

As of March 31, 2015, the Federal Government's obligations under the Agreement were:

	Payment date	Amount
Fifth amortization	June 1, 2015	28
		\$28

Each amortization will include a monthly financial cost as of the day immediately following the cut-off date and until the end of the month immediately preceding the payment date of each, using, for the month of January 2012, the rate corresponding to the arithmetic average of annual rates of return calculated on the basis of the discount rate of the 91-day Cete issued in December 2011, and for subsequent months 91-day CETES future rates corresponding to the immediately preceding month published by the company Proveedor Integral de Precios, S.A., the working day immediately following the cut-off date, or else that of the closest previous month contained in said publication, taken to the 28-day curve, and dividing the resulting rate by 360, multiplying the result by the number of days that have effectively elapsed during the due period, and applying monthly capitalization.

Below is an analysis of the movement in the loan loss estimate for credit risks related to the mortgages covered in the Agreement:

Balance as of January 1, 2010	\$19
Holding company support	67
Haircuts, discounts and cancellations	14
Reserve reclassification	(9)
Contributions to settle trust liabilities	1
Balance as of March 31, 2015	\$92

During 2015 \$1 million were recognized as results in relation to the end point support program.

v. ACCOUNTING CHANGES

The maximum amount of loans not eligible for the Early Termination program with the potential to receive the discount program's benefits to be absorbed by the Holding company is \$14 million.

The amount corresponding to the repurchase of SPECIAL CETES was \$97 million; the outstanding balance of SPECIAL CETES that has not been repurchased by the Federal Government is \$889 million with maturities between 2017 and 2027.

As a result of the termination of the Trusts, in 2010 the Holding company recognized \$330 million in loan loss reserves and \$56 million in deferred taxes in its balance sheet.

VI. LOAN PORTFOLIO SALES TO SOLIDA

According to the new criteria, effective as of January 2008, inflationary accounting no longer applies for re-expressing financial statements.

LOAN PORTFOLIO SALES TO SOLIDA ADMINISTRADORA DE PORTAFOLIOS

On February, 2003 Banorte sold Ps \$1.9 billion (Ps \$1.861 billion in past due loans and Ps \$64 million in Performing loans) of its own portfolio (including interests) to its subsidiary, Solida Administradora de Portafolios, S.A. de C.V. for Ps \$378 million. The transaction was done based on August 2002 figures, and therefore the final figure that affected the February balance was Ps \$1.86 billion, once the collections made since August 2002 are considered. The past due portfolio, as well as Ps \$1.577 billion in associated loan reserves, were cancelled.

As instructed by the CNBV in the document 601-II-323110, we show the integration of the loan portfolio sold in 1Q03 by Banorte to its subsidiary Solida Administradora de Portafolios, S.A. de C.V. The Purpose of this sale was to concentrate the portfolio in this specialized recovery unit as it had been managing the collections of these loans previously. This was a one-time operation and not a permanent transfer procedure of the Solida's portfolio.

Total	1,072	561	557	246	111	11	1,318	672	569

⁽¹⁾ Reserve requirements using the same classification method used for the bank.

In 1Q15 the Loan portfolio showed changes due to: collections of Ps 3.26 million, foreclosed assets of Ps 0.50 million, restructurings of Ps 0.10 million and there were charge offs and discounts of Ps. 46.20 million. In the Loan loss provisions, there were charge offs and discounts of Ps 7.07 million. There were no transfers from performing loans to past due loans and transfers from past due loans to performing loans of Ps 19.93 million.

^(*)There was a Reserve deficit of Ps 3 million as of March 2015.

^(*) The dollar portfolio and reserves are re-expressed in pesos.

^(*) Local Currency includes UDIS valued at the new exchange rate.

VI. LOAN PORTFOLIO SALES TO SOLIDA

According to the new criteria, effective as of January 2008, inflationary accounting no longer applies for re-expressing financial statements.

As instructed by the CNBV in the document 601-II-323110 for purposes of determining financial indicators and a general disclosure referred to regulations, we show the integration of the Banorte's portfolio including the portfolio which was sold to Solida Administradora de Portafolios, S.A. de C.V.

First Quarter 2015

Risk Management

Risk management at Grupo Financiero Banorte is a fundamental factor in determining and implementing the institution's strategic planning.

The Group's risk management and policies comply with regulations and market best practices.

RISK APPETITE

Grupo Financiero Banorte's Board of Directors has defined its limitation for risk through a Risk Appetite Statement.

Risk Appetite is governed by general and specific guidelines and defined as the risk that the institution is willing to take in order to create value and achieve the strategic objectives of profitability, asset quality, liquidity and solvency.

The five General guidelines are principles that the institution has established and are summarized as the following:

- 1. Conservative risk profile: diversified portfolio, growth with high quality and proper capitalization.
- 2. Stability of results: create value for shareholders and seek leadership position in businesses that are a priority for the Group's strategy.
- 3. Integral vision of the client: focus on customer service based on innovation.
- 4. Preserving high reputation: with customers, investors and authorities.
- 5. Social Responsability: To generate social and sustainable investment.

There are specific guidelines for the Group, the Bank and Sofomes that incorporate three aspects:

- 1. Maintainin profitability measured by ROE (Return on Capital), in line with the Group's strategic goals.
- 2. Maintaining a sufficiently diversified portfolio of quality assets.
- 3. Maintaining adequate liquidity and solvency levels to ensure the normal flow of Bank operations through the control and monitoring of the liquidity coverage ratio, Value at Risk (Market VaR) and Capitalization Ratio.

CORPORATE RISK MANAGEMENT GOVERNANCE

The Board of Directors is responsible for authorizing policies and overall strategies, as well as the Risk Appetite for Grupo Financiero Banorte, the framework for comprehensive risk management, risk exposure limitations, risk tolerance levels and mechanisms for the implementation of corrective actions.

The Board of Directors designated the Risk Policy Committee (CPR) as the responsible to manage the risk that GFNorte is exposed to as well as to monitor the performance of operations and that comply with the objectives, policies and procedures for risk management.

The CPR also monitors the overall limits of risk exposure approved by the Board of Directors, in addition to approving specific risk limits for exposure to different types of risk.

The CPR is integrated with members of the Board, the CEO, the Directors of the entities, Risk Management and Audit, this last one participates with voice but no vote.

For the adequate performance of its objective, the CPR performs, among others, the following functions:

- 1. Propose for approval by the Board:
- The framework for overall risk management.
- The global limits of risk exposure.
- The mechanisms for the implementation of corrective actions.
- The cases or special circumstances which may exceed the overall limits as much as the specifics.
- 2. Approve and review at least once a year:
- Specific limits for discretionary risks and the risk tolerance levels for non-discretionary.
- The methodology and procedures to identify, measure, monitor, limit, control, report and disclose various types of risk to which the holding company is exposed to.

• The models, parameters and settings used to carry out the valuation, measurement and control of risks proposed by the unit for comprehensive risk management.

3. Approve:

- The methodologies for the identification, valuation, measurement and control of risks of new business, products and services that the holding intends to offer to the market.
- The corrective actions proposed by the drive for comprehensive risk management.
- Manuals for comprehensive risk management.
- The technical evaluation aspects of risk management.
- 4. Appoint and remove the unit responsible for overall risk management, it is ratified by the Board.
- 5. Report to the Board at least quarterly, the risk profile and its possible negative effects, as well as the non-observance of the Risk Appetite, the follow-up to the limits and tolerance levels.
- 6. Report to the Board on corrective actions taken.

UNIT FOR INTEGRAL RISK ADMINISTRATION (UAIR)

The UAIR helps to identify, measure, monitor, limit, control, report and disclose various types of risk to which the Holding Company is exposed and is in charge of the Risk Management department (DGAR).

The DGAR reports to CPR, in compliance with the provisions of the Circular of the Commission called "prudential provisions in the Field of Risk Management applicable to Credit Institutions", as to the independence of business areas. The DGAR has methodologies to manage credit, market, liquidity and operational risks.

<u>Credit Risk</u>: revenue volatility due changes in loan loss provisions for impaired loans, and, expected losses on borrower or counterparty defaults.

<u>Market Risk:</u> revenue volatility due to market changes, which affect the valuation of positions for active operations, liabilities or causes of contingent liabilities, such as: interest rates, exchange rates, price indices, etc.

<u>Liquidity Risk:</u> potential loss by the impossibility of renewing liabilities or hiring others to the Holding in normal conditions, by early or forced sale of assets at unusual discounts to meet their obligations.

Operational Risk: loss resulting from inadequate or failed processes, personnel, internal systems or external events. This definition includes technological risk and legal risk. Technological Risk groups all those potential losses from damage, interruption, disruption or failures resulting from use of or reliance on hardware, software, systems, applications, networks and any other distribution channel information, while the legal risk involves the potential loss by sanctions for noncompliance with laws and administrative or judicial decisions unfavorable issue appealed in relation to the Holding operations performed.

The main objectives of the DGAR are the following:

- Provide different business areas clear rules that contribute to its correct understanding to minimize risk and ensure
 to be within the parameters established and approved by the Board of Directors and the Risk Policy Committee.
- Establish mechanisms to monitor the risk taking within the Holding trying to mostly be a timely and supported by advanced systems and processes.
- Verify the observance of the Desired Profile Risk.
- · Standardize measurement and risk control.
- Protect the Holding's capital against unexpected losses from market movements, bankruptcies, credit and operational risks.
- Develop pricing models for different types of risks.
- Establish procedures for portfolio optimization and management of credit portfolio.

Credit Risk

It is a risk that clients, issuers or counterparts do not fulfill their payment obligations therefore, proper management is essential to maintain the loan quality of the portfolio.

The objectives of credit risk management at GFNorte are:

- Comply with the Risk Profile defined by the Board of Directors.
- Improve the quality, diversification and composition of the loan portfolio in order to optimize the riskperformance (yield) ratio
- Provide Executive Management with reliable, timely information to assist decision making regarding funding.
- Provide the Business Areas with clear and sufficient tools to support funding placement and follow-up.
- Create economic value for shareholders by efficient loan risk management.
- Define and keep updated the regulatory framework for the credit risk management.
- Comply with the information requirements that the authorities set forth regarding loan risk management.
- Perform risk management in accordance with the best practices, implementing models, methodologies, procedures and systems based on the main advances worldwide.
- Measure institution's vulnerability to extreme conditions and consider those results for decisions making.

Individual Credit Risk

GNorte separates the loan portfolio into two large groups: consumer loans and company loans.

The individual loan risk for consumer loans is identified, measured and controlled by a parametric system (scoring) that includes origination and behavior models for each of the consumer products: mortgage, car, payroll loans and credit cards.

Individual risk for companies is identified within the portfolio, measured and controlled by means of Objective Markets, the Criteria for Risk Acceptance, Early Alerts and Banorte's Internal Risk Rating (CIR Banorte).

The Objective Markets, Criteria for Risk Acceptance and the Early Alerts are tools that, together with the Internal Risk Rating are part of GFNorte's Loan Strategy and support the estimated level of credit risk.

The Target Markets are activities selected by region and economic activity – backed by economic research and loan behavior analysis – where Banorte is interested in placing loans.

The Risk Acceptance Criteria are parameters that describe the risk identified by the industry, which makes it possible to estimate the risk involved for the institution when granting a loan to customer on the bases of their economic activity. The types of risk contemplated in the Risk Acceptance Criteria are financial risk, operation risk, market risk, company life cycle, legal, regulatory, loan experience and management quality.

Early Alerts are a set of criteria based on borrower information and indicators and their conditions that were established as a mechanism for the timely prevention and identification of a probable deterioration in the loan portfolio, thereby enabling the institution to take prompt preventive actions to mitigate the credit risk.

Banorte's CIR is a rating methodology for the borrower which assesses quantitative and qualitative criteria in order to determine the credit quality and it is applied to commercial loans equal to or greater than an amount in Mexican pesos equivalent to four million investment units on the qualification date.

Portfolio Credit Risk

GFNorte has designed a portfolio credit risk method that, besides contemplating international standards in identification, measurement, control and follow-up, has been adapted to work within the context of the Mexican Financial System.

This credit risk methodology makes it possible to know the current value of the portfolio loans of GFNorte, that is, *the loan exposure*, allowing surveillance of the risk concentration levels per risk qualification, geographical regions, economic activities, currency and type of product in order to know the portfolio's profile and take action to direct it toward a diversification which will maximize profitability with the lowest risk.

Calculating loan exposure implies generating a cash flow of each one of the loans, of both capital and interest to discount it later. This exposure is sensible to changes in the market, thereby facilitating calculations under different economic scenarios.

The method, in addition to contemplating loan exposure, takes into consideration the probability of non-compliance, the recovery level associated to each client and the classification of the debtor based on the Merton model. The probability of non-compliance is the probability that the debtor will not meet his/her debt obligation with the institution according to the originally agreed terms and conditions. The probability of non-compliance is based on the transition

matrixes that GFNorte calculates from the migration of the debtors through different risk qualification levels. The recovery ratio is the percentage of total exposure that is estimated to be recovered if the debtor fails to comply. The classification of the debtor, based on the Merton model, associates the debtor's future behavior to loan and market factors on which his "credit health" depends, as determined by statistical techniques.

The results are risk measures such as the expected and unexpected loss at a one-year horizon. The expected loss is the credit portfolio's loss distribution average, which is used to measure the following year's expected loss due to non-compliance or variations in debtors' credit quality. This unexpected loss is an indicator of the loss that could be expected in extreme scenarios and is measured as the difference between the maximum loss given the distribution of losses, at a specific reliability level that in the case of the Banking Sector is 95%, and the expected loss.

The results obtained are used as a tool for better decision-making in granting loans and in the diversification of the portfolio, according to the Banks' global strategy. The individual risk identification tools and the portfolio credit risk methodology are periodically checked and updated to allow the application of new techniques that may support or strengthen them.

As of March 31, 2015, Banco Mercantil del Norte's total portfolio was Ps 462.86 billion. The expected loss represents 1.9% and the unexpected loss is 3.2% with respect to the total portfolio. The average expected loss is 1.9% during the period between January-March 2015.

Regarding Casa de Bolsa Banorte-Ixe, the credit exposure of investments is Ps 114.05 billion and the expected loss represents 0.01% of the exposure. The average expected loss is 0.01% between January-March 2015.

The total portfolio of Arrendadora and Factor, including pure leasing is Ps 21.66 billion. The expected loss represents 0.9% and the unexpected loss is 3.3% of the total portfolio. The prospective loss average represents 0.9% in the period of January-March 2015.

The total portfolio of Solida Administradora de Portafolios was Ps 3.65 billion. The expected loss of the portfolio represents 7.5% and the unexpected loss 9.0% both with respect to the total portfolio. The estimated loss average for the period of January-March 2015 was 7.0%.

The total portfolio of Banorte- Ixe Tarjetas is Ps. 23.47 billion. The expected loss represents 11.1% and the unexpected loss 10.9% both with regard to the total portfolio. The estimated loss average represents 10.7% for the period of January-March 2015.

Credit Risks of Financial Instruments

To identify, measure, supervise and control loan risks of financial instruments there are defined policies for Origination, Analysis, Authorization and Administration.

Origination policies define the types of financial instruments, as well as the method of evaluating the credit risk of the different types of originators / issuers and counterparts. Credit risk is assigned by means of a rating obtained with an internal methodology, through evaluations of external rating agencies or a combination of both. Maximum parameters of operation are also defined depending on the type of originator / issuer or counterpart, rating and type of operation.

Analysis policies include the type of information and the variables considered to analyze operations with financial instruments when they are presented for authorization to the corresponding committee, including information on the originator or counterpart, financial instrument, destination of the operation inside the group and market information.

The Loan Committee authorizes operation lines with financial instruments in accordance with Authorization policies. The request for authorization is submitted to the business sector and other sectors involved in the operation, with all the relevant information for analysis by the Committee who, if considered appropriate, issues its authorization.

Administration policies for transactions with financial instruments consider procedures of Admission, Instrumentation, Compliance with Regulations, Review, Consumption Monitoring, Administration of Lines and Responsibility by the areas and organisms involved in the operation with financial instruments.

On an individual level, the concentration of loan risk with financial instruments is managed on a continuous basis, establishing and monitoring maximum parameters of operation for each tally or originator depending on the qualification and type of operation. There are defined risk diversification policies for portfolios, for economic groups and internal groups. Additionally, the concentration of tally type or originator, size of financial institutions and the region in which it operates are monitored so that an appropriate diversification is obtained and undesired concentrations are avoided.

Credit risk is measured by means of the rating associated with the issuer, emission or tally, which has assigned a level of risk based on two fundamentals:

- 1. The probability of nonfulfillment of the originator, emission or counterpart, which is expressed as a percentage between 0% and 100% where the better the rating or lower rate differential vs. the instrument of a government bond equivalent the lower the probability of nonfulfillment and vice versa.
- 2. The severity of the loss that could be experienced with regard to the total of the operation in the event of nonfulfillment, is expressed as a percentage between 0% and 100% where the better the guarantees or credit structures, the smaller the severity of the loss and vice versa. To mitigating loan risk and to reduce the severity of losses in the event of non-fulfillment, the counterparts have signed ISDA contracts and agreements to net out, in which lines of credit and the use of collateral to mitigate loss in the event of non-fulfillment are implemented.

As of March 31, 2015, exposure to credit risk for Securities Investments of Banco Mercantil del Norte was Ps 283.74 billion, of which 98.9% is rated higher or similar to A-(mex) on a local scale, placing them in investment grade and the 3 main counterparties other than the Federal Government, State Governments and National Financial Institutions represent 7% of the Tier 1 Capital as of December 2014. Additionally, the exposure of investments with the same counterparty other than the Federal Government that represents a higher or similar concentration to 5% of the Net Capital as of December 2014 has similar rating to AAA(mex) and is comprised of (average considered term, amount in billions of pesos and rate): market and bond certificates from Pemex to 7 years and 4 months for Ps 13.87 to 3.1%; Inbursa market certificates for 1 years and 11 months for Ps 7.09 at 3.4%; deposit and market certificates and promissory notes from Banco Santander Mexico for 2 months for Ps 7.92 billion at 3.1%; and market certificates promissory notes from Banobras for 10 months for Ps 4.55 billion at 3.3%.

The exposure of Derivatives is Ps (3.98) billion, of which 96.2% has a rating higher or equal to A-(mex) on local level, placing them in investment grade and the 3 main counterparties other than then Federal or State Governments and National Financial Institutions represent 3% of the Tier 1 Capital of December 2014.

The exposure to credit risk for Securities Investments of Casa de Bolsa Banorte-Ixe was Ps 114.05 billion, of which 99.7% is rated higher or similar to A+(mex) on a local scale, placing them in investment grade and the 3 main counterparties other than the Federal Government, State Governments and National Financial Institutions represent 23% of the Capital as of December 2014. Additionally, the exposure of investments with the same counterparty other than the Federal Government that represents a higher or similar concentration to 5% of the Capital as of December 2014 has a higher or similar rating to A+(mex) and are comprised of (average considered term, amount in billion/million of pesos and rate): market certificates of Pemex to 4 years and 3 months for Ps 2.86 billion at 3.4%;; Scotiabank market certificates for 1 year and 7 months for Ps 1.93 billion at 3.3%; market certificates of Banco Inbursa to 9 months for Ps 1.86 billion at 3.3%; Banamex to 1 year and 6 months for Ps 1.82 billion at 3.3%; market certificates of HSBC to 3 years and 8 months for Ps 1.15 billion at 3.5%; deposit certificates and market certificates of Banco Santander Mexicano to 3 months for Ps 954 million at 3.2%; market certificates of Bancomer to 3 years for Ps 592 million at 3.9%; deposit certificates and market certificates of Banco Interacciones to 1 year and 11 months for Ps 546 million at 3.9%; Deutsche Bank bonds to 8 years and 2 months for Ps 491 million at 9.6%. In the case of derivatives, there are no operations.

Arrendadora y Factor Banorte does not have investments in securities or derivatives.

Exposure to risk of securities of Solida Administradora de Portafolios was Ps 174 million. The 100.0% is distributed in banking instruments. The Institution does not hold positions in derivative instruments.

The exposure to credit risk for Securities Investments of Banorte-Ixe Tarjetas is Ps 272 million, of which 100% of the total are in financial instruments. Banorte-Ixe Tarjetas does not hold investments in derivatives.

Risk Diversification

In December 2005, the CNBV issued "General Rules Applied to Credit Institutions" in relation to Risk Diversification.

These guidelines state that the institutions must carry out an analysis of their borrowers and/or loans to determine the amount of "Common Risk"; also, the institutions must have the necessary information and documentation to prove that the person or group of persons represent common risk in accordance with the assumptions established in those rules

In compliance with the risk diversification rules in asset and liability operations, Banco Mercantil del Norte submits the following information (billion pesos):

Tier 1 as of December 31, 2014	70.00
I. Financings whose individual amounts represent more than 10% of basic equity	
Loan Operations	
Number of financings	2
Total amount of financings	16.58
% in relation to Tier 1	24%
Money Market Operations	
Number of financings	0
Total amount of financings	0
% in relation to Tier 1	0%
Overnight Operations	
Number of financings	0
Total amount of financings	0
% in relation to Tier 1	0%
II. Maximum amount of financing with the 3 largest debtors and common risk groups:	33.56

In compliance with the rules of diversification of risks in active and passive operations, the following information corresponds to Leasing and Factoring (Arrendadora y Factor Banorte) in billion pesos:

Equity as of December 31, 2014	3.73
I. Financings whose individual amounts represent more than 10% of equity	
<u>Loan Operations</u> Number of financings Total amount of financings % in relation to equity	5 3.33 89%
Money Market Operations Number of financings Total amount of financings % in relation to equity	0 0 0%
Overnight Operations Number of financings Total amount of financings % in relation to equity	0 0 0%
II. Maximum amount of financing with the 3 largest debtors and common risk groups:	4.91

In accordance with risk diversification regulations for asset and liability operations, is the following information corresponding to Solida Administradora de Portafolios (billion pesos):

Equity as of December 31, 2014	3.95
I. Financings whose individual amounts represent more than 10% of equity (on a group level):	
<u>Loan Operations</u> Number of financings	0
Total amount of financings	0
% in relation to equity	0%
Money Market Operations Number of financings Total amount of financings	0
% in relation to equity	0%
Overnight Operations Number of financings Total amount of financings % in relation to equity	0 0 0%
II. Maximum amount of financing with the 3 largest debtors and common risk groups:	588

In accordance with risk diversification regulations for asset and liability operations, is the following information corresponding to Banorte-Ixe Tarjetas (Billion Pesos):

Equity as of December 31, 2014	4.96
I. Financings whose individual amounts represent more than 10% of basic equity (on a group level):	
Loan Operations Number of financings	0
Total amount of financings % in relation to equity	0 0%
Money Market Operations Number of financings Total amount of financings % in relation to equity	0 0 0%
Overnight Operations Number of financings Total amount of financings % in relation to equity	0 0 0%
II. Maximum amount of financing with the 3 largest debtors and common risk groups:	5

Bank's Market Risk

Market Risk Management is managed through a series of fundamental pillars, highlighting the use of models and methodologies such as Value at Risk (VaR), BackTesting and Stress Testing, which are used to measure the risk of traded products. The latter is complemented with a framework of policies and handbooks that support the risk management function, but also the implementation, follow up and compliance with market risk limits, and finally the disclosure of the before mentioned limits is performed through monthly reports to the Risk Policy Committee and a daily report to top executives at the institution who take market risk positions.

Value at Risk (VaR) Bank

Exposure of the institution's financial portfolios to market risk is quantified using the standard methodology in the industry known as Value at Risk (VaR).

To ensure that the methodology complies with the market best practices, including those of the main players in the industry, Banorte made an amendment to its VaR methodology effective February 1st, 2015, which was approved by both the institution's Risk Policy Committee and the Board of Directors. The afore mentioned amendment consists of taking a one day horizon base and the use of a non-parametric historical simulation with a 99% confidence level, taking into account 500 historical observations on risk factors.

The VaR model considers all the positions of the institution's financial instruments classified for accounting purposes as trading and available for sale assets, both on and off the balance sheet (Money market, Treasury, stocks, FX transactions and derivatives for trading and hedging purposes).

The average VaR of the portfolio for 1Q15 was Ps 354 million (56 million more than the average VaR for 4Q14) and as percentage of the Net capital (Ps 78.69 billion) at the end of 1Q15 was 0.45%.

BANORTE	1Q14	2Q14	3Q14	4Q14	1Q15
VaR	206	274	379	298	354
Net Capital	72,938	73,493	75,791	77,996	78,690
VaR/ Net Capital	0.28% ⁽¹⁾	0.37% ⁽¹⁾	0.50% ⁽¹⁾	0.38% ⁽¹⁾	0.45%

^{1.} VaR adjusted to the new methodology.

Likewise, the VaR by risk factor for Banorte's portfolio had the following behavior during the first quarter of the year:

Risk Factor	VaR 1Q15
IPC	4
Domestic Rates	97
Foreign Rates	112
Exchange Rate	212
Diversification Effect	(71)
Total VaR	354

Sensibility Analysis and Stress Testing under extreme conditions

Since VaR indicates the potential losses under normal market conditions, Banorte complements its risk analysis by applying tests under extreme conditions known as Stress Testing. This is presented to the Risk Policy Committee on a monthly basis with the main objective of assessing the impact on the institute's positions of extreme movements in risk factors.

Backtesting

In order to validate the effectiveness and accuracy of the VaR, a monthly Backtesting analysis is presented to the Risk Policy Committee. Through this analysis, it is possible to compare losses and gains observed with respect to the estimated value at risk and if necessary make the required adjustments to the VaR.

Value at Risk Casa de Bolsa (VaR)

The average VaR of the portfolio for 1Q15, is Ps 26 million and as a percentage of the Global Capital (Ps 2.402 billion) for the quarter is 1.08%.

	1Q15
VaR	26
Global Capital	2,402
VaR/ Global Capital	1.08%

The VaR per risk factor is determined by simulating 500 historical scenarios and assessing instruments by their main risk factor. It is important to note that Casa de Bolsa Banorte-Ixe positions taken into account for the analysis were those classified as trading and available for sale, excluding held to maturity positions.

Risk Factor	VaR 1Q15
IPC	0
Domestica Rates	26
Diversification	0
Total VaR Casa de Bolsa	26

Stress Testing under extreme conditions

Since risk measurement (VaR) shows potential losses under normal market conditions, Banorte complements its risk analysis by applying tests under extreme conditions known as *Stress Testing*. This is presented to the Risk Policy Committee on a monthly basis with the main objective of demonstrating the impact on the institute's positions by important movements in risk factors.

Backtesting

In order to validate the effectiveness and accuracy of the VaR, a monthly Backtesting analysis is presented to the Risk Policy Committee. Through this analysis it is possible to compare losses and gains observed with respect to the estimated value at risk and if necessary make the required adjustments to the VaR.

Liquidity Risk

Liquidity risk is managed through a series of fundamental pillars that include the use of indicators such as the Liquidity Coverage Ratio (LCR), funding stability and concentration ratios as well as liquidity stress testing, including the follow up of a liquidity risk metric better known as survival horizon. The latter based on a framework of policies and handbooks, including a liquidity contingency plan. Similarly, the liquidity risk management framework takes into account limits and risk appetite quantitative metrics. The disclosure of the metrics and indicators and their compliance with the established limits, but also the risk appetite is reviewed through monthly reports to the Risk Policy Committee, weekly reports to the Capital and Liquidity Management Group and quarterly reports to the Board of Directors.

During 1Q15, no deviations were observed in any of the risk appetite indicators or liquidity risk limits.

Profile and Financing Strategy

The composition and evolution of the bank's funding during is shown in the following table.

Deposits	4Q14	1Q15	Change vs. 4Q14
Interest-Bearing Demand Deposits (Local Currency)	267,144	270,958	1.40%
Interest-Bearing Demand Deposits (Foreign Currency)	20,695	23,439	13.30%
Total Demand Deposits	287,839	294,397	2.30%
Time Deposits – Retail (Local Currency)	113,520	114,847	1.20%
Time Deposits – Retail (Foreign Currency)	13,940	15,428	10.70%
Core Deposits	415,299	424,672	2.30%
Money Market (1) (Local Currency)	58,241	63,993	9.90%
Money Market ⁽²⁾ (Foreign Currency)	4,510	4,619	2.40%
Total Bank Deposits	478,050	493,284	3.20%

^{1.} Money Market & Time Deposits

^{2.} Includes bonds

Liquidity Coverage Ratio

The LCR allows the quantification of liquidity risk through the relationship between liquid assets and net cash outflows in the next 30 days, under a regulatory stress scenario.

The LCR is an indicator designed to ensure that the institution has the liquidity to meet its short term obligations, under an extreme scenario using exclusively high quality liquid assets as source of funding.

The following table presents the average evolution of LCR components.

	Bank and SOFO		SOFOM
		Unweighted Amount (average)	Weighted Amount (average)
СО	MPUTABLE LIQUID ASSETS		
1	Total Computable Liquid Assets	N/A	63,950
CA	SH DISBURSEMENTS		
2	Unsecured retail funding	320,428	25,769
3	Stable funding	125,478	6,274
4	Less stable funding	194,949	19,495
5	Unsecured wholesale funding	149,449	62,201
6	Operational Deposits	71,307	15,737
7	Non-Operational Deposits	78,142	46,464
8	Unsecured debt		
9	Secured wholesale funding	N/A	20,837
10	Additional Requirements:	193,814	24,134
11	Outflows related to derivatives and other securities requirements	16,137	7,956
12	Outflows related to losses from debt instruments	-	-
13	Credit and Liquidity Facilities	176,933	16,178
14	Other contractual funding obligations		
15	Other contingent funding liabilities		
16	TOTAL CASH OUTFLOWS	N/A	132,941
CA	SH INFLOWS		
17	Cash Inflows for secured operations	14,579	2,352
18	Cash Inflows for unsecured operations	69,344	43,623
19	Other Cash Inflows	4,636	4,636
20	TOTAL CASH INFLOWS	88,559	50,610
	Adjusted amount		
21	TOTAL COMPUTABLE LIQUID ASSETS	N/A	63,950
22	TOTAL NETO CASH OUTLFOWS	N/A	82,331
23	LIQUID COVERAGE RATIO	N/A	78%

During 1Q15, the average LCR for the Bank and Sofoms was 77.67%, and at the end of the month (1Q15), the LCR was 77.90%, the aforementioned levels are above the risk appetite and the regulatory minimum standards.

Evolution of LCR Components

The evolution of the LCR components comparing 4Q14 and 1Q15 is presented in the following table.

Component	4Q14	1Q15	Change vs. 4Q14
Liquid Assets	72,361	64,672	-10.6%
Cash Inflows	52,221	52,763	1.0%
Cash Outflows	136,447	135,783	-0.5%

The Liquid Assets that compute in the LCRs for the Bank and Sofoms between the 1Q14 and 1Q15 are distributed as follows:

Type of Asset	4Q14	1Q15	Change vs. 4Q14
Total	72,361	64,672	-10.6%
Level I	62,442	55,373	-11.3%
Level II	9,919	9,299	-6.3%
Level II A	9,879	9,234	-6.5%
Level II B	40	65	62.5%

Main causes of LCR results

Product of the normal activities of Banorte and Sofoms as well as the liquidity management within the institution, contrasting the end of 4Q14 with the end of 1Q15, the following events were observed:

- Cash outflows were relatively stable when comparing the close of both quarters. However, there was an
 increase of 9.4% in Traditional and Non Traditional funding outflows as well as a decrease in outflows
 associated to Committed Lines of Credit.
- Cash Inflows also remained stable when comparing both quarters, noting that the Loan portfolio cash inflows decreased by 8.5%.
- Liquid Assets in 1Q15 decreased by 10.6% vs. 4Q14.

Liquidity Risk in foreign currency

Additionally, for liquidity risk quantification and follow-up, in the specific case of the foreign currency denominated portfolio, Banorte uses the criteria established by the Banco de México for the assessment of the foreign currency Liquidity Coefficient.

Exposure to Derivatives and possible Margin calls

Banorte applies the regulatory methodology to determine cash outflows for derivatives. At the end 1Q15, estimated outflows for derivatives were as follows:

	1Q15
Net cash outflows at market value and for potential future exposure	4,068
Cash outflows for a 3 notch credit rating downgrade.	1,395

Liquidity Gaps

As part of the liquidity analysis for the Bank, 30 days liquidity gaps for the institution's active and liabilities (obligations) are analyzed.

Results for the Bank at the end of 1Q15 are presented in the following table.

Concept	1Q15
Cumulative 30 days Gap	-59,872
Liquid assets	64,672
Net Capital	80,064
Liquidity vs Net Capital	80.8%

Interest Rate Risk

The structural risk of the Balance Sheet is assessed using, among other methodologies, the analysis of balance sheet simulation, which allows the evaluation of future static or dynamic behavior in the Balance Sheet. For the base case, a sensitivity analysis of the movements in the different currencies and rates is carried out, obtaining the impact of such changes on the Economic Value and on the Annual Income.

Stress Testing under extreme conditions

As part of its liquidity risk management, Banorte performs tests under extreme liquidity circumstances with internal scenarios to assess the Bank's liquidity adequacy., A total of 9 scenarios, based on 3 sources of risk (systemic, idiosyncratic and combined) with 3 levels of severity (moderate, medium and severe) are used.

Contingency Funding Plan

For the purpose of having comprehensive liquidity management practices, and to ensure its operation in adverse situations in terms of liquidity, Banorte has implemented a contingency funding plan, which incorporates elements to identify possible liquidity problems and defines alternate funding sources available to deal with contingencies.

Subsidiaries

Liquidity Risk Management processes for the Bank and its Sofoms are consolidated and controlled by a comprehensive Risk Management Team for Grupo Financiero Banorte.

Key liquidity indicators for 1Q15 are presented in the following table:

Liquidity Ratio	Casa de Bolsa Banorte-Ixe	Arrendadora y Factor	Sólida Administradora de Portafolios	Banorte-Ixe Tarjetas
Cumulative 30 days Gap	1,418	-1,793	-4,608	2,339
Liquid assets	2,418	63	203	278
Net Capital*	2,379	3,858	3,841	4,291
Liquidity vs Net Capital*	101.6%	1.6%	5.3%	6.5%

^{*}Casa de Bolsa Banorte Ixe takes into account Global Capital

Operational Risk

GFNorte has a formal Operational Risk department pertaining to the "Deputy Managing Director of Financial and Operational Risk', same that reports directly to the Managing Director of Risk Management.

Operational Risk is defined as the potential loss due to failures or deficiencies in the internal controls, errors in operation processing and storing or in data transmitting, as well as to adverse administrative and judicial rulings, fraud or theft (this definition includes Technological and Legal risk).

The objectives of the Operational Risk Management are: a) To allow and support the organization to reach its institutional objectives through the prevention and management of operational risks; b) To insure that the existing operational risks and the required controls are duly identified, assessed and in line with the risk strategy established by the organization; and c) To insure that the operational risks are duly quantified in order to make the proper capital allocation per operational risk.

Pillars of Operational Risk Management

I. Policies, Objectives and Guidelines

As part of the institutional regulations, there are documented policies, objectives, guidelines, methodologies and responsible areas in Operating Risk management.

The Operating Risk Directorship maintains close communication and coordination with the Regulatory Comptrollership in order to facilitate effective Internal Control in which the proper procedures and controls are established that will mitigate Operating Risk in the processes, and provide follow up through the Internal Audit Department.

The Regulatory Comptrollership, as part of the Internal Control System, carries out the following activities to mitigate risk: a) Internal control validations; b) Institutional regulations management and control; c) Monitoring of operating processes' internal control by means of control indicators reports, that are reported by the process comptrollers in the various areas; d) Money Laundering Prevention process management; e) Control and follow up of the regulatory provisions; and f) Analysis and assessment of the operating processes and projects with the participation of the responsible directors of each process in order to insure adequate internal control.

II. Quantitative and Qualitative Measuring Tools

Operating Losses Database

To record operating loss events, has a system that enables the central information supplier areas to directly record such events online, which are classified by Type of Event in accordance with the following categories:

Types of Events	Description
Internal Fraud	Losses derived from a type of action intended to defraud, unlawfully take goods or sidestep regulations, laws or company policies (excluding diversity/discrimination events) in which at least one company party is involved.
External Fraud	Losses derived from a type of action intended to defraud, unlawfully take goods or sidestep the laws, caused by a third party.
Labor Relations and Safety in the Workplace	Losses caused by acts that are incompatible with the legislation or labor agreements regarding hygiene or safety, the payment of personal damage claims, or cases associated with diversity/discrimination.
Customers, Products & Business Practices	Losses caused by involuntary noncompliance or negligence of a professional obligation to specific customers (including fiduciary and adjustment requirements), or due to the nature or design of a product.
Natural Disasters and Other Events	Losses caused by damage or harm to material assets as a consequence of natural disasters or other events.
Incidences in the Business and Systems Failures	Losses caused by incidences in the business and systems failures
Process Execution, Delivery and Management	Losses caused by errors in operations processing or management, as well as the relations with commercial counterparties and providers.

This historical Database provides the statistics of the operating events in which the institution has incurred so as to be able to determine their trends, frequencies, impact and distribution. Moreover, the Database will make it possible in the future to have enough information to calculate the capital requirements per Advances Models.

Legal and Fiscal Contingencies Database

For the recording and follow-up of legal, administrative and tax issues that may arise from adverse unappealable ruling, an internal system called "Legal Risk Issues Monitoring System" (SMARL) was developed. This system enables the central data supplying areas to record such events directly and on-line, which are then classified by company, sector and legal issue, among others.

As part of GFNorte's legal risk management, legal and fiscal contingencies are estimated by the attorneys that process the issues based on an internal methodology. This makes it possible to create the necessary book reserve to face such estimated contingencies.

Risk Management Model

GFNorte has defined objectives, which are achieved through different plans, programs and projects. Compliance with such objectives may be adversely affected due to operating risks, for which reason a methodology must be in place to manage them within the organization. Consequently, operating risk management is now an institutional policy defined and supported by senior management.

To perform Operating Risk Management, each of the operating risks involved in the processes must be identified in order to analyze them. In this regard, the risks identified by the Regulatory Comptrollership are processed in order to eliminate or mitigate them (seeking to reduce their severity or frequency) by defining tolerance levels, as the case may be. At present, work is being done on developing a new Institution Operating Risk Management Model and the technological tools needed to implement it.

III. Required Capital Calculation

In accordance with the Capitalization for Operational Risk Regulations in effect, the institution has adopted the Basic Model, which is calculated and reported periodically to the authorities.

IV. Information and Reporting

The information generated by the Database and the Management Model is processes periodically to report to the Risk Policies Committee and the Board of Directors regarding the main operating events that were detected, the trends, identified risks and their mitigating strategies. Reporting is also done on the status of the main Operating Risk mitigation initiatives implemented by the various areas of the organization.

Technology risk

Technological Risk is defined as all potential losses from damage, interruption, alteration or failures derived from the use of or dependence on hardware, software, systems, applications, networks and any other information distribution channel in the rendering of banking services to the customers. This risk forms an inherent part of Operating Risk, which is why its management is handled collectively throughout the entire organization.

To address the Operating Risk associated with information integrity, and "Integrity Committee" has been created. Its objectives are to align security and information control efforts under a prevention focus, to define new strategies, policies, processes or procedures and to provide solutions to information security issues that affect or may affect the Institutional patrimony.

The functions established by the CNBV or Technology Risk Management are performed by the Institution under institution regulatory and Integrity Committee guidelines.

To address the Operating Risk caused by high impact external events, GFNorte has a Business Continuity Plan (BCP) and Disaster Recovery Plan (DRP) based on a same-time data replication system at an alternate computer site. All the above cover the backup and recovery of the Institution's critical applications in the event or any relevant operating contingency.

Legal risk

Legal Risk is defined as the potential loss from failure to comply with the applicable legal and administrative provisions, the issuance of indisputable unfavorable court rulings and the application of penalties regarding the operations that the institution performs.

The Legal Risk must be measured as an inherent part of Operating Risk in order to understand and estimate its impact. Therefore, those legal issues which result in actual operating losses of the SMARL system are later recorded in the SCERO a database of operational events.

Based on the statistics of the current legal issues and real loss events, the Institution can identify specific legal or operating risks, which are analyzed in order to eliminate or mitigate them in an attempt to reduce or limit their future occurrence or impact.

Internal Control

The companies comprising GFNorte have an Internal Control System (SCI) that has been structured according to the guidelines set forth by their Board of Directors, which establishes a general internal control framework, as well as the environment in which it must operate in order to provide reasonable security regarding the effectiveness and efficiency objectives of the operations, reliability on financial statements and compliance of regulation and legal framework.

The SCI's mission is to help running an adequate internal control in the operations and in data generating and recording. The system is made up of various elements:

- A. The Board of Directors with the support of the Advisory Board, Risk Policies Committee (CPR), Audit and Corporate Practices Committee (CAPS) and Human Resources Committee.
- B. The CEO and the departments which support him: Unit Risk Management (UAIR), Legal Department and the Comptroller, responsible for ensuring that adequate control levels, operational risks and compliance with regulation are maintained.
- C. Internal Audit, External Audit and the Commissary (The Commissary applies only to GFNorte subsidiaries) as additional support structures to check how the Internal Control System functions and provide reasonable assurance regarding the reliability of the generated data. The Internal Audit Department reports to the Audit and Corporate Practices Committee (CAPS) and maintains full independence from the administrative areas.
- D. The Executive Group as main responsible persons for SCI assurance according to the functions and responsibilities assigned to them. In addition to promoting the enforcement of the regulations established for the Institution and the strategies set forth by the GFNorte's CEO.
- E. Documents that establish the general control criteria that should be followed in the operation and reporting of transactions; in optimizing human, material and technological resources; in the use, security, timeliness and reliability of the information; and in the due compliance with the external and internal regulations. The Code of Conduct that regulates the behavior that each Board member, officer or employee of the Group should assume while performing their activities stress out.
- F. Policy and procedure manuals that regulate documentation, recording and liquidation of operations that the Institution carries out and establish the control points that should be observed, assuring the separation of functions, clear assigning of responsibilities, safekeeping of information and prevention of unlawful acts.

During the first quarter of 2015, activities related to strengthening control, risk evaluation and management, establishment and monitoring of controls, and assurance of quality information continued to be developed; highlighting the following:

- A. The various Corporate Governance Committees have had the required financial, economic, accounting and/or legal information for proper decision-making.
- B. The policies and procedure manuals have been updated as per changes in external regulations, new products, and changes in the Institution's processes or improvements to internal controls. Additionally, there has been continuous follow-up of the improvement actions regarding the observations made by the different members of the SCI
- C. The Supervisory Authorities' requirements have been addressed and the information required by the external regulations has been submitted.
- D. Through Process and Management Controllers, various business and support processes that make up the operation in GFNorte are monitored, to report periodically on compliance and identifying where areas of opportunity for timely remediation.
- E. During the quarter, and according to the work plan developed at the beginning of the year, various activities in terms of accounting internal control were carried out.

Requests regarding internal control subjects from diverse internal departments were handled, to the development of new institutional projects, as well as those derived from the Financial Reform.

FINANCIAL SITUATION AND LIQUIDITY

Treasury Policy

GFNorte's Treasury Department is the central unit in charge of balancing GFNorte's resource needs, monitoring and managing the regulatory levels, eliminating the rate risk of fixed-rate placement operations by using coverage and implementing arbitrage strategies.

The main cash currencies and investment in securities are in Mexican pesos and U.S. dollars.

Internal and External Liquidity Sources

The internal liquidity sources, in local as well as foreign currency, come from the various deposit products that the institution offers its customers: checking accounts and term deposits.

Regarding external sources of liquidity, it has diverse mechanisms to access the debt and capital markets. The Institution obtains resources through the issuance of debt securities, loans from other institutions - including the Central Bank and international organisms -, as well as from the issuance of subordinated debt. Also considered is the liquidity that the Institution obtains through its proprietary repos' securities that qualify for this type of transactions. It also has the alternative of obtaining resources through the issuance of shares representing equity.

Currently, the Institution has diverse sources of liquidity. Deposits, including interest bearing and non-interest bearing demand and time deposits, are the bank's main source of liquidity. Negotiable and short term instruments, such as government securities and deposits in the Central Bank and other banks, are liquid assets that generate interest. Liquid assets also include deposits in foreign banks, which are denominated mainly in US dollars.

Detailed information related to liquidity sources is reported in different headings of the GFNorte's Balance Sheet in this report

Dividend Policy

During the April 30, 2003 session, the Board of Directors approved a dividend payment policy in which it will propose to the General Ordinary Stockholders' Meeting a dividend payment consisting of at least 15% of the Partnership's net recurring profit, providing that there is no legal impediment and that market conditions and the Partnership's financial situation allow it.

On October 17, 2011, the Ordinary General Shareholders' Meeting approved to modify the Dividend Policy, for the purpose of aligning dividend payments to the Financial Groups' business performance, so as of this year, dividend payments will be as follows:

- i. 16% of recurring net income in the event that profit growth is between 0% and 10% during the year.
- ii. 18% of recurring net income in the event that profit growth is between 11% and 20% during the year.
- iii. 20% of recurring net income in the event that profit growth is greater than 21%.

Related Parties Loans

According to Article 73 of the Law of Credit Institutions, loans granted to related parties of credit institutions cannot surpass the established limit of 35% of the basic part of the net capital.
